Education

University of Warwick — Coventry, UK
BSc Computer Science (1^{rst} year 73% // 1:1 grade) — *Oct 2025 – Jul 2028*

Jumeirah College — Dubai, AE
Computer Science (A), Mathematics (A), Physics (A)* — *Aug 2023 – Aug 2025*

Projects

ML: Exam Past Paper Analysis Generator — *Python, TensorFlow, Sentence-BERT, RegEx*

- Trained an ML model to analyze past exam papers and generate topic-based papers.
- Used **TensoreFlow** lib to differenate between types of pages, then used **RegEx** to section data for processing
- Implemented a hierarchical data structure to **manage context** between different subparts of questions
- Database linked to Google Sheets and Bag-Of-Words model was used for topic detection
- Made a workshop on the project teaching it to 50 students in 4 workshops across a month during Sixth Form

Full stack Devolpoment: Sixth Form Sports Day — *Python, Google Sheets, Google Appsheet*

- Led team of 7 to develop my school's first **interactive data entry application** for the school's sports day.
- Managed testing, user training, bug fixes, and feature improvements based on user feedback.
- Implemented using Google Suite, was **modular** allowing for variable amounts of students, classes and year groups.
- Data predominately processed using formulea inside table, allowing for **live scoreboard** and **point tracking**
- Implemented methords to **promote candinates** for record breakers, allowing for thoose indivuals to be **awared medals autmoacially** after events.

Automated Blog Generation & B2B Lead Generation — *Python, WIX, LinkedIn, HTML parsing*

- Important part of this project is its **ethicality**: licensing, AI-gen content, data collection and automated outreach
- For Blogs Generation, Public **domain/CC0** articles where used, this would then be rewriten using LLMs. The rewriten article would be reformated and uploaded to **WIX**
- After being pulled, article would then be **hashed** (ensuring no repeats) and, SEO and GEO would be generated for the articled and would be uploaded along side generated images and text.
- For Lead Generation, in pretesting a metasearch engine (**SearXNG**) and was later privoted to offical APIs
- Each Lead would be judged (by a decition model) on a selection of atributes from relevence, size, location ext.
- Data collected using mutliple sources (including LinkedIn) and only **minimal amounts public-facing data** was recorded (to be *deleated* after the selection).

Experience

Reactive Security Awareness Intern — Jul 2024 – Aug 2024
Phishrod Labs — *Lahore, Pakistan*

- Assisted in cybersecurity research focusing on mitigating **human error-related breaches**.
- Pitched security awareness programs to educational institutions.
- Gained practical experience in **cybersecurity protocols**and practices.

Software Engineering Intern — Jul 2024 – Aug 2024
The Total Finance Resolver — *Dubai, UAE*

- Developed and implemented a WIX-integrated blog posting system and B2B Lead Generator
- Reviewed outreach regulations including **PECR** and **GDPR** while learning the fundamentals of financial trading and markets.

Technical Skills & Extras

A Warwick **UnderGrad Global Excellence Scholar** (only 97 student in 2025) and working on **CompTIA Security+**
Languages: Java, Python, C, Haskell **Certs**: CompTIA ITF+ **Developer Tools**: Git, Wireshark, Burp Suite
HackTheBox: @aayanaliuk **TryHackME**: tryhackme.com/p/aayanaliuk
